			Short-term exposure limit (15-minute reference period)	-	-	-

Exposure Controls

- Eye / Skin Protection:** Wear protective gloves/eye protection/face protection. Avoid eye contact. Use safety glasses with side shield or goggles.
- Respiratory Protection:** Ensure adequate and ongoing ventilation is maintained in order to prevent build up of excessive vapour and to ensure occupational exposure limits are adhered to. If appropriate, and depending on your patterns and volumes of use, the following engineering controls may be required as additional protective measures:
- Isolate mixing rooms and other areas where this material is used or openly handled. Maintain these areas under negative air pressure relative to the rest of the plant.
 - Employ the use of Personal protective equipment - an approved, properly fitted respirator with organic vapour cartridges or canisters and particulate filters.
 - Use local exhaust ventilation around open tanks and other open sources of potential exposures in order to avoid excessive inhalation, including places where this material is openly weighed or measured. In addition, use general dilution ventilation of the work area to eliminate or reduce possible worker exposures.

d) Use closed systems for transferring and processing this material.
Also refer to Sections 2 and 7.
